Foreword

It is my pleasure to present the Statistical Handbook 2025 of the University of Peradeniya. This annual publication continues to serve as an important institutional resource, providing a comprehensive overview of the University's key statistics and developments across academic, administrative, and support services.

The handbook compiles updated data relating to student enrolment, academic performance, postgraduate activities, staff distribution, financial management, library services, and student welfare. These statistics provide valuable insights into the functioning and progress of the University during the past year.

In an environment where data-driven decision making is essential for institutional growth, reliable statistical information plays a pivotal role in supporting planning, monitoring, and policy formulation. The information presented in this volume contributes to strengthening transparency, accountability, and evidence-based management within the University.

I would like to express my sincere appreciation to Ms. Kanchana Atapattu, Statistical Officer, and to the staff of the Statistics & Information Division of the University and all faculties, institutes, and administrative units that contributed data and provided support in the preparation of this publication. Their dedication ensures the continued availability of accurate and timely information for the benefit of the University community.

I fervently hope that this handbook will remain a valuable reference for administrators, academics, researchers, and other stakeholders as we collectively strive to advance the mission and excellence of the University of Peradeniya.

Total Usage	47,396	33,081	70,737
Grand Total of All Resource Usage			151,214

Note:

1. Physical Loans: Refers to physical items borrowed and checked out by users through the library lending system.
2. Online Access (Digital): Refers to digital materials accessed via online platforms including e-books and subscription databases.
3. Reference Consultations: Refers to items consulted within the library premises but not borrowed.
4. Zero (0) indicates that the usage category is applicable but no usage was recorded during 2025.
5. Printed journals are available for reference use only and are not available for home lending.
6. JSTOR usage statistics are derived from JSTOR platform usage reports for 2025. JSTOR metrics (Searches Regular, Item Investigations, Item Requests) are recorded separately from general database access and represent different measures of platform engagement.
7. The University Library Network does not currently maintain a dedicated e-book lending platform. Physical book loans are managed through the library management system.
8. Data covers the University Library Network comprising the Main Library and eight Faculty Libraries for the period 1 January to 31 December 2025.
9. All figures are for the calendar year 2025.

Table 4.6 | Physical Visits to the University Library Network by User Category - 2025
