Foreword

It is with great pride that I present the Statistical Handbook 2024 of the University of Peradeniya. This annual publication embodies our ongoing commitment to fostering a culture of evidence-based decision-making, transparency, and accountability academic integrity.

In an era where data plays a pivotal role in shaping institutional strategy and policy, this handbook serves as an indispensable tool for informed planning and evaluation. From student Enrolment and academic performance to research output, administrative operations, and Financial Management, the data compiled here offers critical insights that guide our efforts to enhance the quality and effectiveness of our university's functions.

Reliable data empowers us to make decisions that are not only strategic but also responsive to the evolving needs of our academic community. It enables us to identify emerging trends, allocate resources more efficiently and objectively, and set measurable goals that support continuous improvement across all sectors of the university.

I extend my gratitude to everyone involved in creating this handbook and encourage all members of our university community to engage with this resource, as we collectively strive to advance the mission of the University of Peradeniya.
